## YOGA

Yoga practices are based on thousands years of use. Yoga is not dogmatic but rather a science for personal evolution. Yoga is far from being mere physical, breathing acrobatics or demonstration of magic or supernatural powers; it is a science of the future with a holistic vision relevant to a progressive society. It is a conscious process for raising us to a level of mental and emotional serenity through holistic approach to body & Mind. Our YOGA MASTER involves physical postures, breathing and deep relaxation techniques. These practices can be customized to individual needs. Yoga postures and breathing techniques can be geared towards the beginner to unwind the inner being through this ancient science.

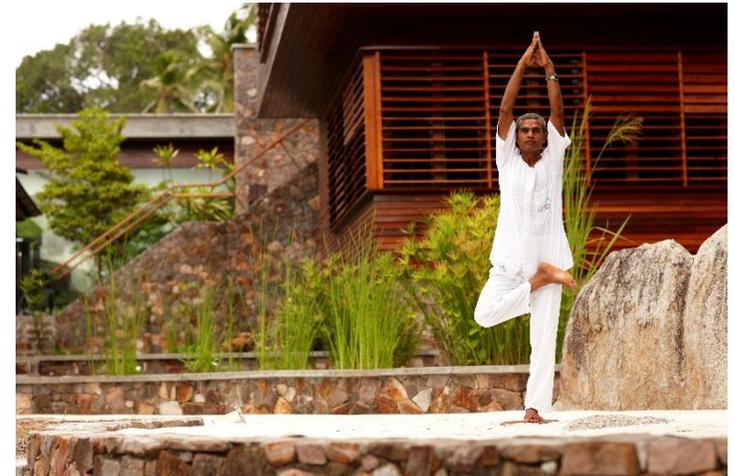

### THE ART OF BREATHING

Conscious control and regulation of breathing combined with restful poses to rejuvenate and relax your body help to purify the mind at the end of the day. This involves paying attention to breathing and regulating the duration of inhalation and exhalation.

### STRENGTHEN YOUR BACK

Collection of remedial poses in building and strengthening the spine; holding the pose helps to give a mild traction to the spine and stretches the muscles attached. Total relaxation practiced through awareness and detachment through autosuggestion.

60 minutes	SCR 1900
90 minutes	SCR 2400

Daily resort group yoga session is complimentary. Private lessons can be booked thru the Spa Reception or your Private Assistant.
